

The MyMuCo Music Learning System

Finally, a music teaching tool for iPads that captivates students while making it easier for instructors to manage and deliver lessons and practice assignments. Consisting of two apps, **MyMuCo Teacher** and the companion **MyMuCo Kids**, this unique subscription based tool gets students practicing more by engaging them and their parents with technology. Teachers can carry their entire studio on an iPad for the ultimate in flexibility, allowing them to easily and conveniently delivery their own unique, personalized music program whether in-home or in-studio.

Studio Management PLUS Student Engagement

MyMuCO Teacher allows more flexibility and efficiency than you ever dreamed possible. Use it to:

- Easily create lessons and practice plans for your students anytime – anywhere – even while in the lesson!
- Create a teaching library of your own,
- Manage your student information,
- AND MORE...

MyMuCo Teacher can be used by itself to manage your whole studio – BUT – when your students also use MyMuCo Kids, you get additional features including “one-tap” practice transfers to your student, automatic student registration AND student practice performance data!

MyMuCo Kids is a fun and engaging way for music students to follow through on their daily music practice while developing good practice habits and strengthening their understanding of music. Suitable for children aged 5+, MyMuCo Kids works together with MyMuCo Teacher - starting at the weekly music lesson, and guides young students thru their entire musical week.

With the MyMuCo Music Learning System, practices are logged and the information, including student comments and practice ratings, are fed back to the teacher.
